

Dear Offaly County Council, i am writing this submission so that you consider changing the zoning of lands at the corner of Lock House View on the Sragh Road in Tullamore - from the G category to the R category in the next issue of the Tullamore Towns & Environs Development Plan. The site with Folio number: OY19493F (map attached) is a fully enclosed with concrete block wall. The site has become a dumping ground in recent times (photos attached showing rubbish before and after i removed it). The rezoning of the lands will allow for development on the site and will ultimately deter any dumping. The zoning that is currently associated with the site is mixed/general 'green', recreation and conservation and other (G5) The local authority zone description describes these lands by the following statement: "Shall be taken to include the use of land for; afforestation, playgrounds, housing estate open spaces, parks and development incidental to the enjoyment of open space. It also provides for facilities for games, educational and recreational purposes." The site in question is not and has never been used as any of the activities listed above. I request that the zoning be changed to new/proposed residential, strategic residential reserve (R1). I am full owner and holder of the title for these lands.
