

That Bord Na Mona lands from Edenderry Power across to Derrygreenagh be zoned industrial for a Green Energy Hub, this would complement the 5 Wind Farms that have received full planning permission in this area and alongside Edenderry Power who intend to go 100% biomass. This would create a very attractive land bank powered by 100% green energy, close to Dublin, close to motorways, grid connectivity at Rhode business park and would be an ideal site for new and heavy industries to locate in Ireland.  
Cllr Noel Cribbin
