

We are writing in relation to our observations of the Killeigh Village Plan contained within Draft 2 of the Offaly County Development Plan. We are happy that Killeigh has been identified as 'rural' as part of the Core Strategy with sustainable development of the open countryside being supported. We would welcome the current open space zoning remaining in the final version of the plan. The inclusion of a flood zone in the draft plan is also encouraging however we would welcome the inclusion of the important archaeological features on the village map.
